

3 ~ 6 Flutes HARDMAX

Size $\phi 1 \sim \phi 12$

HMS

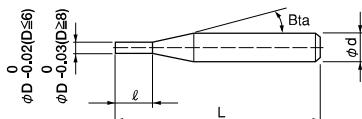

Material Applications (★ Highly Recommended ● Recommended ○ Suggested)

			Work Material														
Carbon Steels	Alloy Steels	Prehardened Steels	Hardened Steels					Cast Iron	Aluminum Alloys	Graphite	Copper	Plastics	Glass Filled Plastics	Titanium Alloys	Heat Resistant Alloys	Cemented Carbide	Hard Brittle (Non-Metallic) Materials
S45C S55C	SK / SCM SUS	NAK HPM	~ 50HRC	~ 55HRC	~ 60HRC	~ 65HRC	~ 70HRC										

Features

Offering outstanding tool life by selecting appropriate 3, 4 or 6 flutes on each tool diameter.
Highly efficient milling on hard materials up to 65HRC with HARDMAX COAT.

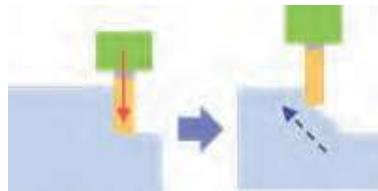

The shank taper angle shown is not an exact value and to avoid contact with the work piece, we recommend the user controls the precise value of this angle. Shank taper angle should not make contact with the work piece.

Chip color : Selection example of optimal milling conditions from the viewpoint of cutting heat

SKH51 (63HRC)

Climb up milling by Square end mills

- Work size : $50 \times 50 \times 30$ mm
- Coolant : Air blow (Through spindle)

What is climb up milling?

A milling method that makes effective use of the length of cut to make a large Z-cut in the first shot, and then runs up step by step.

1. Check the chip color under 6 types of conditions

	Spindle Speed (min ⁻¹)	Feed Rate (mm/min)	a_p (mm)	a_e (mm)	Feed per tooth (mm/t)	Chip color	Result	Efficiency (mm ³ /min)
Condition 1	4,000	1,350	10	0.15	0.056	Dark Blue	✗	2,025
Condition 2	3,000	1,000	10	0.15	0.056	Red Gold	✓	1,500
Condition 3	2,000	675	10	0.15	0.056	Gold	✓	1,013
Condition 4	2,000	675	20	0.2	0.056	Red Gold	✓	2,700
Condition 5	2,000	1,000	20	0.2	0.083	Red Gold	✓	4,000
Condition 6	2,000	1,000	20	0.4	0.083	Dark Blue	✗	8,000

2. Relationship between chip color and cutting heat

3. Optimal cutting condition

Condition 5 is judged to be the optimum condition based on the chip color and processing efficiency.
No damage due to chipping of tools after 1 hour roughing process.

Tool after 1 hour roughing process
